## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's amendment filed on November 10, 2005 has been entered:
  - Claims 1, 5-6, 11 and 17-19 have been amended;
  - Claims 2-4 and 12-14 have been cancelled;

### ***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. Authorization for this examiner's amendment was given in a telephone interview with Alexander D. Forman (# 51,691) on November 29, 2005.

### **Claims**

4. The claims have been amended as follows:
  - a. Claim 1, line 2, delete "movable".  
Claim 1, line 2, following "first", insert --adjustable--.  
Claim 1, line 3, delete "movable".  
Claim 1, line 3, following "second", insert --separately adjustable--.

Art Unit: 2875

Claim 1, line 8, following “simultaneously”, insert --when the first reflector is adjusted--.

b. Claim 11, line 5, delete “movable”.

Claim 11, line 5, following the 1<sup>st</sup> appearance “first”, insert --adjustable--.

Claim 11, line 6, delete “movable”.

Claim 11, line 6, following the 1<sup>st</sup> appearance “second”, insert --separately adjustable--.

Claim 11, line 17, delete “simultaneously”.

Claim 11, line 17, following the 2<sup>nd</sup> appearance “first”, insert --reflector, which moves the first--.

c. Claim 17, line 2, delete “movable”.

Claim 17, line 2, following “first”, insert --adjustable--.

Claim 17, line 3, delete “movable”.

Claim 17, line 3, following “second”, insert --separately adjustable--.

***Allowable Subject Matter***

5. Claims 1, 5-11 and 15-20 are allowed.
6. The following is the examiner's statement of reasons for allowance:

Art Unit: 2875

7. Claim 1 is allowed because in part recites a headlight lamp assembly having “a first adjustable reflector, a second adjustable reflector and an adjuster bracket having a threaded cylinder and connecting the first and second reflectors,” wherein “the second reflector has at least one ball socket and is a separately adjustable reflector” and “the adjuster bracket, the first reflector and the second reflector move simultaneously when the first reflector is adjusted.” This unique combination in a headlight lamp assembly is not taught by the prior art of record, and it allows adjusting the aim direction of low (or high) beam of the headlight lamp without changing the direction of the other beam. This allows the driver to adjust the aiming direction (angle) of a low beam from its manufacturer’s default setting to the optimal angle for the driver without changing the aiming angle of the high beam, which provides more comfortable driving condition and thereby improves the safety of the driver significantly at night or on a cloudy day. Further, the first and second reflectors connected by the adjuster bracket can be repaired separately when one of them is damaged. Repairing a single reflector costs much less than replacing the entire headlight lamp system. Thus, the headlight lamp with the unique features described above will cost less in maintenance.

8. Claim 17 is allowed because in part recites an headlight lamp assembly having “a first adjustable reflector, a second adjustable reflector and a means for connecting the first and second reflectors,” wherein “the second reflector has at least one ball socket and is separately adjustable without moving the first reflector” and “any adjustment of the first reflector will cause a corresponding adjustment in the second

Art Unit: 2875

reflector.” This unique combination in a headlight lamp assembly is not taught by the prior art of record, and it allows adjusting the aim direction of low (or high) beam of the headlight lamp without changing the direction of the other beam. This allows the driver to adjust the aiming direction (angle) of a low beam from its manufacturer’s default setting to the optimal angle for the driver without changing the aiming angle of the high beam, which provides more comfortable driving condition and thereby improves the safety of the driver significantly at night or on a cloudy day. Further, the first and second reflectors connected by a connecting means can be repaired separately when one of them is damaged. Repairing a single reflector costs much less than replacing the entire headlight lamp system. Thus, the headlight lamp with the unique features described above will cost less in maintenance.

9. Claim 11 is allowed because claim 11 is drawn to an operational method corresponding to the apparatus of claim 1.
10. Claims 5-10 are allowed because of their dependency upon independent claim 1.
11. Claims 15 and 16 are allowed because of their dependency upon independent claim 11.
12. Claims 18-20 are allowed because of their dependency upon independent claim 17.

13. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
